Research positions

2023 – now — **Max Planck Institute for Astrophysics**, Postdoc fellow at the Stellar Department. Director: prof. Selma de Mink.

2019 – 2023 — **Nicolaus Copernicus Astronomical Center, the Polish Academy of Sciences**, PhD student under the MAESTRO research grant: *Astrophysics of Gravitational Waves* (PI K. Belczynski). Supervisor: prof. Tomasz Bulik.

2018 – 2019 — **Center of Theoretical Physics, the Polish Academy of Sciences.** A scholarship student under the MAESTRO research grant: *Constraints on the dark energy properties from observations of active galactic nuclei* (PI B. Czerny). Supervisor: prof. Bozena Czerny.

Education

Oct. 2019–Sept. 2023 — **Nicolaus Copernicus Astronomical Center, Warsaw.** Ph.D. degree (with distinction), thesis defense on Sept. 29th, 2023.

2017–2019 — **University of Warsaw, Department of Physics.** M.Sc. in Astronomy.

2013–2017 — **Warsaw University of Technology, Department of Physics.** B.Sc. in Applied Physics.

Selected talks and seminars

June 2025 — Princeton, USA; [Seminar] *The origin of gravitational wave sources. Isolated binary progenitors of binary black hole mergers.* Informal seminar for the research group of prof. Eliot Quataert at Princeton University, Department of Astrophysical Sciences.

April 2025 — Milano, Italy; [Seminar] *Supermassive black holes stripping a subgiant star down to its helium core: a new type of multi-messenger source for LISA*. Seminar for the astrophysics department of Milano Bicocca.

March 2025 — Munich, Germany; [Talk] *Supermassive black holes stripping a subgiant star down to its helium core: a new type of multi-messenger source for LISA*. Talk during MIAPbP workshops *Unveiling a Universe of Black Holes: The next Generation of AGN Surveys*.

December 2024 — Paris, France; [Seminar] *The origin of compact object mergers*. Seminar for high energy group of the Institut d'Astrophysique de Paris.

September 2024 — Garching bei Munchen, Germany; [Talk] *Gravitational wave signal from circular, mass transferring star- supermassive black hole systems* during conference *LISA Astrophysics Working Group Meeting 2024.*

October 2024 — Leiden, Netherlands; [**Invited talk**] *The origin of compact object mergers.Isolated binary formation scenarios.* during conference *Challenges and future perspectives in gravitational- wave astronomy: O4 and beyond.*

September 2024 — Warsaw, Poland; [Talk] *Gravitational wave signal from circular, mass transferring star-supermassive black hole systems* during conference *Galactic and extragalactic X-ray transients, theory and observational perspectives.*

Selected talks and seminars (continued)

August 2024 — Cape Town, South Africa; [Talk] *Unequal-mass, highly-spinning binary black hole mergers in stable mass transfer formation channel* during *IAU General Assembly 2024.*

July 2024 — Liege, Belgium; [Talk] *Unequal-mass, highly-spinning binary black hole mergers in stable mass transfer formation channel* during *41st Liège International Astrophysical Colloquium: The eventful life of massive star multiples.*

May 2024 — Birmingham, UK; [**Invited Panelist**] *Panel Discussion - Binary Formation Channels* during *Gravitational Wave Physics and Astronomy Workshop GWPAW 2024.*

March 2024 — Warsaw, Poland; [Seminar] *Fingerprints of binary star interactions in the parameters of binary black hole mergers* - department seminar at Warsaw Astronomical Observatory.

November 2023 — Garching bei Munchen, Germany; [Seminar] *The origin of gravitational wave sources. Isolated binary progenitors of binary black hole mergers - department seminar at Max Planck Institute of Astrophysics.*

July 2023 — Milano, Italy; [Panelist] *What can/should astrophysicists and pop-synthers predict?* during *Gravitational-wave populations: what's next?*

Jan. 2023 — Garching bei Munchen, Germany; [Seminar] *What can we learn about stars from gravitational waves?* - seminar at Max Planck Institute for Astrophysics during Stellar Department Meeting.

Jan. 2023 — Quy Nhon, Vietnam; [**Invited Talk**] *What can we learn about stars from gravitational waves?* during *Rencontres du Vietnam. TMEX-2023 Conference.*

April 2022 — San Juan, Puerto Rico; [Talk] *The role of supernova convection for the depth of lower mass gap and the isolated binary formation of LVK sources* during *2022 INTERMEDIATE-MASS BLACK HOLES New Science from Stellar Evolution to Cosmology.*

Nov. 2021 — Torun, Poland; [Seminar] *Impact of common envelope development criteria on the formation of BH-BH mergers* - departmental seminar at Nicolaus Copernicus Astronomical Center in Torun.

Nov. 2021 — Online; [Seminar] *The origin of BH-BH mergers. The isolated binary evolution scenario*. Seminar for high energy group of the Institut d'Astrophysique de Paris.

Sept. 2021 — Online; [Talk] *Impact of common envelope development criteria on the formation of LIGO/Virgo sources* during *XL Congress of the Polish Astronomical Society 2021.*

Aug. 2021 — Lisbon, Portugal; [Talk] *Impact of common envelope development criteria on the formation of LIGO/Virgo sources* during *Global meeting of the GWVerse COST action Lisbon.*

July 2021 — Online; [Talk] *Binary neutron star formation and the origin of GW170817* during *Sixteenth Marcel Grossman Meeting*.

Sept. 2019 — Warsaw, Poland; [Talk] *Synthetic catalog of black holes in the Milky Way* during *Astrophysics with GW detections.*

Summer schools

Aug. 2022 — Sanata Barbara, USA. Participation in *The 2022 MESA Summer School.*

Aug. 2021 — Copenhagen, Denmark. Participation in *NBIA Summer School on Gravitational Wave Astrophysics.*

Awards and funding

Feb 2025 — Winner of **SALTO** exchange program between MPG, Germany and CNRS, France.

July 2022 — Winner of scholarships from **the Minister of Education and Science (Poland)** for outstanding young scientists in 2022.

Awards and funding (continued)

May 2022 — Winner of **START 2022** stipend of the Foundation for Polish Science dedicated to 100 best young scientists (under 30 year old) that represent all fields of science with additional honor award of **the Prof. Adam Sobiczewski Prize** for researchers who conduct scientific research in the field of mathematics, theoretical physics, or astronomy.

Dec. 2021 — Winner of **Award for young researcher 2021** of Nicolaus Copernicus Astronomical Center.

Skills

Programming — C, C++, Python, Bash, LaTeX, html

Other tools — Overleaf, Population synthesis codes, MESA, WordPress

Language — Polish (native), English (excellent), French (beginner), German (beginner)

Additional activities

Duties and roles

- Core member of LISA Consortium (since May 2025).
- Postdoc representative at Max Planck Institute for Astrophysics (since June 2024).
- Part of the Stellar Department's recruitment committee in selecting PhD candidates for IMPRS) program
- Referee for journals: MNRAS, ApJL, A&A, Nature and Nature Commmunications.
- PhD students representative in the Scientific Council (2021/22) of the Nicolaus Copernicus Astronomical Center, Warsaw.

Organization

- Part of Local Organizing Committee of LISA Astrophysics Working Group Meeting at Max Planck Institute for Astrophysics: https://events.gwdg.de/event/875/overview
- Co-organized Stellar Department Seminars (SESTAS) at Max Planck Institute for Astrophysics (2023/24)
- Organizer and main coordinator of *5th Meeting of young astronomers* 2022 at Nicolaus Copernicus Astronomical Center (online). Event website: https://events.camk.edu.pl/event/41/.

Teaching

- Teaching Assistant during MESA workshops being a part of *IAU General Assembly 2024, Cape Town* (IAU Hackathons).
- Physics and Computer Science teacher for middle and high school students during two editions of the school under the sails program, Niebieska Szkoła, specifically the 14th edition (September-November 2016) and the 24th edition(January-March 2020).
- Assistance in introducing new members (PhD students and postdocs) to the science and software of the research group.

Science popularization

April 2025 — **Phys.org** and **Universe Today.** Popular science articles summarizing my publication by *Phys.org* and *Universe Today* titled *Supermassive black holes could strip stars down to their helium cores*

Additional activities (continued)

Oct. 2022	**Magazine ACADEMIA.** Article for ACADEMIA, the Magazine of Polish Academy of Sciences: *Space-time ripples*
July 2022	**Magazine Interia.** Interview for Tygodnik Interia: *Our Galaxy is expected to host around 150 million black holes*
June 2022	**Polish Radio.** Interview for Polish Radio: *Secrets of the black holes formation.*
Oct. 2020	**Nature Research Highlights.** Interview for Nature Research Highlights: *The odd couple: how a pair of mismatched black holes formed*.
Oct. 2020	**Science in Poland.** Interview for Science in Poland website: *Scientists explain how two black holes of hugely different masses collided*.
Nov. 2019	**Warsaw, Poland.** Lecture for general public organized by Nicolaus Copernicus Astronomical Center *Black holes in the Milky Way.*.
Sept. 2019	**Warsaw, Poland.** Lecture for physics teachers organized by Nicolaus Copernicus Astronomical Center *Black holes in the Milky Way.*.

Publications

I am a co-author of **23** peer-reviewed scientific articles and the leading author of **7** of them.
ADS Public Library: https://ui.adsabs.harvard.edu/public-libraries/UoLMup96RQe2hPXDjU3Mcw.
ORCID: https://orcid.org/0000-0002-6105-6492/.
